

HARMONY WORLD VILLAGE MEMORIAL GUIDELINES

Project Overview:

The proposed memorial aims to create a tranquil and contemplative space where residents and visitors can reflect on the importance of unity and ethical appreciation for mother earth and related natural sciences. Central to the memorial will be the internment of a sacred geometric sphere called the Crystal Seed, carefully designed to represent harmony and interconnection among all living beings. The sphere will be buried within the designated plot of tribe land, becoming a symbolic link between the community, the memorial and mother earth itself.

Objectives:

1. *Promote Unity:* The memorial will serve as a unifying symbol, encouraging residents to embrace a shared responsibility towards environmental stewardship and ethical appreciation for mother earth and related natural sciences.
2. *Environmental Awareness:* By dedicating a specific area of tribe land to this memorial, we aim to raise awareness about the importance of preserving nature and promoting sustainable practices within our community.
3. *Educational Opportunity:* The memorial will provide an educational resource for schools, colleges, and community organizations, allowing them to organize workshops, lectures, and events centered around ecology, environmental sciences, and the significance of ethical appreciation for our planet.
4. *Aesthetic Enhancement:* The memorial will contribute to the beautification of the chosen plot of land, creating an aesthetically pleasing environment for residents and visitors to enjoy.

Proposed Location and Design:

We suggest allocating a suitable plot of tribe land in a serene and accessible location, preferably within a park or a nature reserve. The site should offer an appropriate balance of visibility and tranquility, allowing individuals to engage with the memorial while enjoying a peaceful natural setting.

The design of the memorial will also include the subsurface installment of a sacred geometric sphere, constructed with durable and environmentally friendly materials. Careful consideration will be given to the design's aesthetics, ensuring it harmonizes with the surrounding natural

environment. Additionally, interpretive signage and seating areas can be integrated, providing visitors with information and a comfortable space for reflection.

Funding and Maintenance:

The proposed memorial project will be funded through a combination of public and private contributions. We will actively seek financial support from community organizations, local businesses, and interested individuals who share our vision. A detailed budget will be prepared, outlining the estimated costs for design, construction, installation, and ongoing maintenance of the memorial.

We propose forming a dedicated committee comprising representatives from the the tribes, the municipalities, community organizations, and environmental experts to oversee the implementation and maintenance of the memorial. The committee will be responsible for coordinating fundraising efforts, ensuring the memorial's upkeep, and organizing educational programs.

Conclusion:

By dedicating a plot of tribe land to a small memorial that features burying a sacred geometric sphere representing unity through ethical appreciation for mother earth and natural sciences, we aim to inspire our community to develop a deeper connection with the environment and embrace sustainable practices. This memorial will serve as a symbol of our commitment to environmental stewardship and will provide a space for reflection and education.
